Software Engineer

Experienced in Ruby on Rails, JavaScript and ReactJs based programming and a background in Construction Project Management. Possess strong skills in problem solving, time management and is extremely detail-oriented. Takes pleasure in addressing day-to-day problems as challenges to better my own skills.

Technologies and Languages

JavaScript, React, Ruby, Rails, Redux, SQL, PostgreSQL, Heroku, Postman, Sinatra, Git, CSS

TECHNICAL PROJECTS

Not Shake Shack - Github
Food ordering app for restaurant brick and mortar locations.
- Utilized JWT Web Tokens and localStorage to store encrypted user information client-side
- Engineered functional backend database allowing it to be self-sustaining using Ruby on Rails.
- Created the frontend using ReactJs allowing the user to navigate the website and update data as needed
- Integrated a stripe checkout using the Stripe API

Lucid Real Estate - Github
Housing app that allows a user to add homes to their portfolio
- Built a backend database using Ruby on Rails
- Enabled ReactJs front end to fetch and render all the information from the database
- Crafted a sign in modal to persist on the frontend with scroll
- Distributed different data from the database by using multiple useEffects

My Portfolio - Github
Personal website to be used for personal career marketing and branding
- Created and separated all components that kept the DOM in sync with the data
- Integrated useState hook to track state in multiple function components
- Built a modern and responsive navbar that persisted with scrolling
- Utilized multiple contact options to help diversify my personal brand
